REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Claims 1-11 are allowable because the prior art fails to teach or suggest that when the at least a second MOSFET initially is turned on, and the first MOSFET begins to turn off, a gate current i_g will flow from the gate of the first MOSFET to the source of the first MOSFET through the at least a second MOSFET, and the gate current i_g is larger than the load current i_d .

Claim 12 is allowable because the prior art fails to teach that the very low gate resistance in the first MOSFET plus the very low on resistance of the at least a second MOSFET plus the very low resistance of the source to source connection plus the very low resistance of the gate to drain connection is less than the ratio of V_{th} to I_d .

Claim 13 is allowable because the prior art fails to teach or suggest the sequence of turning off the first and second MOSFETs as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quan Tra whose telephone number is 571-272-1755. The examiner can normally be reached on 8:00 A.M.-5:00 P.M..
